## Comoros explosion-proof UPS uninterruptible power supply system

What is an explosion-proof uninterruptible power supply system (UPS)? Orga helps make daily operations easier, with Orga's Explosion-proof (EX) Uninterruptible Power Supply system (UPS). What does an Explosion-proof Uninterruptible Power Supply system do? The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off. Why do I need an ex-certified UPS (uninterruptible power supply)? The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off. This ensures that critical systems keep running in order to keep the asset safe and compliant with relevant regulations in every situation, even in hazardous areas. Why are uninterruptible power supplies important? Uninterruptible power supplies (UPS) are becoming increasingly significant as the importance of decentralized power sources grows and the dependability of power supply networks declines. Especially for applications that are safety essential or have a high need for plant availability. How is the ex Ups built? The EX UPS is built in accordance with the system sizing calculation and based on client requirements. Each system is built up in 1 x 100%, 2 x 100%, 2 x 50% or N+1 configuration and customised to the client's preferred setup. Each system is built up from one or more EX battery boxes and one or more EX battery chargers for even more reliability. What is the iups101 uninterruptible power supply system? The iUPS101 Uninterruptible Power Supply system is certified for use in ATEX and IECEx Zone 1 and 2 hazardous areas. It provides back up power to protect critical equipment, such as instrumentation and control systems, navigation and landing lighting, or blow out prevention systems, in the event of a blackout or brownout. Want to find out more? How many kVA does an ex Ups supply? Over 1,225 kVA in EX UPS's supplied to offshore assets, represented by 350 charger modules in the last 10 years. This system is designed to meet both your specific requirements and is zone 1 certified for the use in a gas hazardous area. This robust system has a long life span and requires minimal maintenance.
