What equipment & systems qualification is required for offshore electrical substations? Equipment and systems qualification such as energy storage systems (ESS), computer-based systems, power electronic converters, large power transformers, Medium Voltage (MV), High Voltage (HV) gas insulated switchgear equipment, circuit breakers for DC and AC systems, installed on the offshore electrical substations facilities. What are the requirements for system earthing for low and high voltage systems? System earthing for low and high voltage systems are to comply with 4-8-4/25 of the Marine Vessel Rules or 4-3-3/Table 2 of the MOU Rules. The following additional requirements are to be met: Do CCMS & CCMS need a backup power supply? Machinery Spaces, the CCMS and spaces fitted with essential systems are to be provided with lighting and provided with backup power supply for the same period of emergency lighting as required for the installation. Obstruction lights are to be provided as prescribed by the National Authority having jurisdiction. Can electrical service platforms/offshore substations be used to transfer power? Electrical service platforms/offshore substations systems may be used to transfer power to onshore substation/grid, and the arrangements are to be in accordance with Subsection 3/3. Lithium-ion Battery systems are to comply with the Lithium-ion Batteries Requirements. Do submersible ballast pumps need to be stored onboard? If submersible ballast pumps are installed in each ballast tank, one spare pump is to be stored onboard at all times. The normal or emergency operation of the ballast system is not to introduce a greater risk of progressive flooding due to the opening of hatches, manholes, etc. in watertight boundaries. What are the requirements for substation operations? For substation operations, the requirements of the flag and/or coastal Administration are to be complied with. Substations are to maintain at least two access/exit gangways during operations to facilitate personnel escape in the event of an emergency. I don't have many appliances at all, so I've dug around and asked what other people use their powerpack to power up. Here's a quick guide to what you can run on this power pack: 1. Cordless power tool battery chargers (typically 5w-20w) You can charge multiple times before any noticeable power drain 2.
