An eclipse is an awe-inspiring celestial event that drastically Eclipse We call this an eclipse. A solar eclipse happens when the moon passes directly in front of the sun. The moon is much, much smaller than the sun. But it is also much, much, closer to Earth, and Lunar eclipse A partial lunar eclipse refers to the Moon lying partially inside of the umbra, where the relative size of the Earth in the lunar sky allows it to block the Sun entirely. During a partial eclipse, the dark Eclipse Basics - National
