Is Aboitiz Power Building a hybrid battery energy storage system in Cebu? MANILA, Philippines -- Aboitiz Power Corp. is building a 30-megawatt hybrid battery energy storage system (BESS) project within the Mactan Economic Zone in Cebu. Slated for commissioning in the first half of , the project is poised to become one of the first large-scale energy storage systems in Central Visayas. Will Bess be the first large-scale energy storage system in Central Visayas? Slated for commissioning in the first half of , the project is poised to become one of the first large-scale energy storage systems in Central Visayas. MANILA, Philippines -- Aboitiz Power Corp. is building a 30-megawatt hybrid battery energy storage system (BESS) project within the Mactan Economic Zone in Cebu. Does Cebu need more power investments? DOE Central Visayas Director Renante Sevilla lauded the BESS project in Mactan, saying that Cebu needs additional power investments given its rapid progress. / KOC Can advanced storage strengthen the Philippines' green energy system? "Together with forward-thinking partners, we are ready to shape and strengthen a robust green energy system in the Philippines and Southeast Asia," he added. SUMEC Philippines General Manager Lennon Zong highlighted the role of advanced storage in the Philippines' clean energy journey. Why should we invest in energy storage in the Philippines? "This energy storage project is not just another venture--it is a testament to our shared commitment to advancing clean energy in the Philippines. By integrating advanced storage technology, we are not only enhancing grid stability but also ensuring that renewable energy can be supplied reliably, day and night. What is Central Visayas energy storage system? Slated for commissioning in the first half of , the facility is one of the first large-scale energy storage systems in Central Visayas. It aims to support rising power demand from industries and businesses in the area and enhance grid stability amid the energy transition.
