Super Farad Capacitor 30v

What is a 1 farad capacitor? A 1-farad capacitor would be able to store 1 coulomb (a very large amount of charge) with the application of only 1 volt. One farad is, thus, a very large capacitance. Typical capacitors range from fractions of a picofarad to millifarads. Figure 3 shows some common capacitors. Where can I buy supercapacitors & ultracapacitor? The link could not be generated at this time. Please try again. Supercapacitors & Ultracapacitors are available at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for many supercapacitor and ultracapacitor manufacturers including Cornell Dubilier, Eaton, Elna, KEMET, KYOCERA AVX, Maxwell, Vishay & more. Is a Farad a large capacitance? By definition, a capacitor is able to store of charge (a very large amount of charge) when the potential difference between its plates is only. One farad is therefore a very large capacitance. Typical capacitance values range from picofarads (pF) to millifarads (mF), which also includes microfarads (µF).
