

## Turn on battery storage

### Turn on battery storage

How do I enable Battery Saver? To manually enable the battery saver, go to Settings > System > Power & battery > Battery saver and click Turn on now. Alternatively, to enable battery saver automatically, go to Power & battery settings, expand Battery saver, and set the desired activation percentage.

How do I Turn on battery saver on Windows 10? In Settings > System > Power & battery, find Battery saver. Toggle Turn on automatically if my battery falls below and set a threshold (typically 20%). Click the network, sound, or battery icon on the taskbar to open the Quick Settings. Click Battery saver to enable it instantly.

How to activate Battery Saver in Windows 11? o Open Windows 11 Settings using Windows key + I keyboard shortcut, then navigate to "System" section and select "Power & battery" from the available options. o Scroll down to locate "Battery saver" section, which displays current battery percentage, estimated remaining time, and battery saver activation controls for immediate or scheduled use.

What is Battery Saver mode in Windows 11? Battery Saver mode in Windows 11 helps extend battery life by constraining background movement and diminishing screen brightness.

Enable Battery Saver: Go to System > Power & battery, then scroll down to Battery saver.

What happens when Battery Saver is on Windows 10? When battery saver is on, some Windows features are disabled or behave differently. By default, battery saver is turned off unless you manually turn on battery saver, or you have battery saver set to automatically turn on when your battery falls below a percentage you set.

How do I save a laptop battery? o Choose "Power saver" plan for maximum battery conservation, or select "Balanced" plan and click "Change plan settings" to customize screen dimming and sleep timeouts. o Modify "Turn off the display" and "Put the computer to sleep" settings to shorter intervals during battery operation, reducing power consumption during inactive periods. > Right-click the battery icon in the taskbar and select "Power and sleep settings". > Expand the "Energy saver" section and look for "Turn energy saver on automatically when battery level is at".
